

Advanced Cooling Solutions

INDUSTRIAL RADIATOR AND CHARGE AIR COOLER MODULES

Advanced Cooling Solutions (ACS) offers radiators and charge air coolers for the industrial market including pumps, compressors and off-road applications. ACS will design and provide custom high-quality heat exchangers for your application providing exceptional value to our customers. ACS has an array of low-cost country sourcing relationships that we can best match to our customers' requirements with the capabilities of those suppliers. From design to delivery to service after the sale, we take care of all the aspects of your cooling needs. All ACS products are backed by a full warranty.

Technical Features

- Thermal and mechanical design by ACS
- Customer prints and models
- Radiators, charge air coolers and oil coolers sourced from multiple locations
- Aluminum bar & plate heat exchangers
- Low to mid volume applications
- Engineered mounting points and side channels
- Engineered top tanks for surge protection
- Sight glass and level gauges ports
- Shrouds, core guards, OSHA compliant fan guards and hose kits available
- Aluminum bar & plate cores can be power washed up to 3,200 psi
- Heat exchanger cores and metal fabrications painted or powder coated standard black
